### B.Sc. II Sem III Project

B.Sc. II year students perform the project of Herbarium. In these projects students collect the plant present locally and press and dried this plant for a week to remove water content present in it. After that they give chemical treatment to the plant for preventing of infection of fungi and other organisms to plant specimens. They prepare Herbarium Sheet of appropriate size for mounting of plant. After the mounting of plant label to plant as per accepted classification system and also mention the place of collection, name of collector and date of collection.
