Department of Botany

DATE 2ND SEPTEMBER 2016

Action Taken Report

District Level Wild Vegetable Competition

Objective: To study and document the traditional wild vegetable plants in Buldana district.

The Context: Nature has lots of miracles. It is knitted with different shades of colours and variety of medicinal plants. Plants blossom in the beginning of rainy season. Without sowing seeds different types of wild vegetables grown on mountains and in forest. Wild vegetables are nature's gift for us. In tribal region people eat wild vegetables as their food. These vegetables are good in taste and have their own medicinal values. It has been observed that the traditional knowledge on wild vegetable plants is sharply declining. Unless special efforts are made to educate the younger generation about the importance, the medicinal plants may get lost in near future. The study of the medicinal plant can contribute significantly not only to the developed society but also improve food security in tribal areas as these plants are good sources of required nutrition for health

The collection of wild vegetable plants is the main task of this practice. To collect the medicinal plants and their medicinal value, a District level competition by the Department of Botany was organized. The information regarding the competition was spread through students in the nearby area. For the publicity pamphlets were distributed, the competition details were published in the District newspaper. To get maximum participation local cable network was also used. It was open for all age groups with good knowledge of wild vegetables. As a result 90 contestants including 50 women and 25 students participated in the competition with their recipes of the wild vegetables. The contestants give detail information about the medicinal value of the plants also. After the examination of the plants and their recipes winners were declared. Winner participants were given

District Level Wild Vegetable Competition

certificates with cash prizes 700, 500 and 300 respectively to First, Second and the Third winner.

To save and spread the traditional knowledge of wild vegetable, this competition was organized on 2nd Sept 2016. This Competition was free to all age groups. About 90 participants took parts in this competition, prizes also distributed to the women and students for their efforts. Principal, Dr. N. B. Bhusari and Dr. V. U. Pochhi were Organizer and Co-Cordinator for the said competition.

Evidence of Success: In this District level competition 90 contestants participated with 40 different varieties of Wild vegetables. Participants explained its medicinal and nutritional values. Traditional knowledge about these wild vegetables was collected and documented.

Problems occurred and resources required: The main challenge is to find and identify the wild vegetables. It is very tedious work to found and collect the wild vegetables in stipulated period because most of the wild vegetables are available in monsoon season. As an attempt, first we visited the local people who have good knowledge of wild vegetables. Students from different villages also collected these plants and its information from villagers.
