DATE 24TH SEPTEMBER 2022

Activity and Action Taken Report

Nature has lots of miracles. It is knitted with different shades of colors and variety of medicinal plants. Plants blossom in the beginning of rainy season. Without sowing seeds different types of wild vegetables grown on mountains and in forest. Wild vegetables are nature's gift for us. In tribal region people eat wild vegetables as their food. These vegetables are good in taste and have their own medicinal values. It has been observed that the traditional knowledge on wild vegetable plants is sharply declining. Unless special efforts are made to educate the younger generation about the importance, the medicinal plants may get lost in near future. The study of the medicinal plant can contribute significantly not only to the developed society but also improve food security in tribal areas as these plants are good sources of required nutrition for health

The collection of wild vegetable plants is the main task of this practice. To collect the medicinal plants and their medicinal value, a wild vegetables competition by the Department of Botany was organized. It was open for all age groups with good knowledge of wild vegetables. As a result 31 students participated in the competition with their recipes of the wild vegetables. The contestants give detail information about the medicinal value of the plants also. After the examination of the plants and their recipes winners were declared. Winner participants were given E- certificates with cash prizes.

To save and spread the traditional knowledge of wild vegetable, this competition was organized on 24th Sept 2022. Principal, Dr. O.S.Deshmukh Sir and Dr. V. U. Pochhi IQAC Coordinator and HOD, Botany guided for this activity.
